What is the MWWA?

The Association is dedicated to the stewardship of the environment and public health by providing its members with educational opportunities and the promotion of operators across the Province.

Objectives

The objectives of the Association are:

- To advance public awareness of the role of MWWA members in protecting the environment and public health.
- To plan and conduct a variety of educational opportunities suited to the needs and requirements of the members.
- To communicate with the members of the association so as to determine their needs, and to ensure that they are aware of the educational opportunities and programs being offered by the Association.
- To promote activities through which funds may be raised to support the activities of the association.
- To plan for the continued operation of the Association and its programs through the recruitment and training of volunteers.
- To provide delegates to and support of the programs and policies of the Western Canada Water & Wastewater Association.
- To promote the sharing of information between members.

What are the Benefits of Membership?

Education

The Association is the primary trainer of Water and Wastewater operators in the province. High quality water and safe effective wastewater treatment are essential, and are needs that can only increase in the future. To help provide this essential service, we are dedicated to training qualified professionals who have high standards and who continue to learn as the water and wastewater industries advance. If you are currently working in the field then becoming a member of the Manitoba Water & Wastewater Association could be vital to your future.

We will be offering many training opportunities for members and as such we cannot guarantee your participation, as members will be given first chance to attend. Further, the Association is offering member pricing for conferences & training.

Industry Magazine

As a member you will receive "Western Canada Water" twice a year. This is the official Magazine of the Western Canada Water & Wastewater Association, of which MWWA is a Constituent member. The Mission statement of Western Canada Water & Wastewater Association states: "To support & advance the role of Constituent Organization members in protecting the Environment & public health through water & wastewater education & training."

The Constituent Organizations of WCWWA are:

- Alberta Water & Wastewater Operator Association (AWWOA)
- Saskatchewan Water & Wastewater Association (SWWA)
- Municipal Service & Suppliers Association (MSSA)
- Western Canada Section American Waterworks Assoc. (AWWA)
- Western Canada - Water Environment Association (WEF/WCWEA)
- Western Canada-Water Environment Association (WCWEA)

These associations are focused solely on your industry and the many changes that are occurring daily.

What are the benefits to those other than members?

The benefit of membership to others who are not operators of water & wastewater facilities is the opportunity to attend, or help conduct, the many excellent & informative seminars & schools offered each year through the Association. Membership also provides many opportunities to interact with other individuals associated with the water & wastewater industry and to keep informed of new developments
